(54) SENDING SYSTEM FOR SUBSCRIBER LINE TEST RESULT

(57)Abstract:

PURPOSE: To improve the service of the test result by using the announcement device to connect the result of the subscriber line test to the network and informing the subscriber.

CONSTITUTION: By using a network 7, announcement trunks 8 and 9 and an announcement device 10, the announcement that the test result is false is connected to a subscriber circuit 5 and the announcement that the test result is good is connected to a subscriber circuit 6. At the time of the completion of the test, when the result is false, the subscriber circuit 5 and a test link 3 are connected in a subscriber line test device 4. Thus, a subscriber 1 hears the announcement that the test result is false. When the test result is good, the subscriber circuit 6 and the test link 3 are connected in the subscriber line test device 4. Thus, the subscriber 1 can hear the announcement that the test result is good.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision
of rejection]

[Date of requesting appeal against examiner's
decision of rejection]

[Date of extinction of right]
